EZEKIEL PROSPER JOHN

Kogi State, Nigeria | ezekielprosper777@gmail.com | +234 811 740 6860 | github.com/Prosper700 | huggingface.co/codeLumi

Computer Science graduate and full-stack developer building Shopify storefronts, mobile apps, websites and AI models. I use AI to build and test faster, and I love providing backend solution and creating business logics. I also enjoy connecting with people and seeing life based on their perspective.

EDUCATION

B.Sc. Computer Science, Faculty of Computing and Informatics *2022 – 2026*
Confluence University of Science and Technology (CUSTECH), Kogi State, Nigeria.

RESEARCH AND TECHNICAL EXPERIENCE

Shopify Developer: Awaken Coffee(Demo) *2026*

- Rebuilt a Figma Community design as a Shopify store on the Skeleton theme, with custom Liquid sections for the hero, category tiles, featured products, testimonials and promo banner, all editable in the theme editor.
- Restyled the header, footer, product page and cart while leaving Shopify's cart and checkout logic alone.
- Tuned to Lighthouse mobile scores of 100 accessibility, 100 best practices and 92 SEO (performance 66) by fixing icon labels, heading order, contrast and alt text.

Lead Developer & Researcher: whisper-naija-v3b *2026*

- Fine-tuned OpenAI Whisper Small jointly on Igbo, Yoruba and Hausa speech (9.86% word error rate on trained datasets) and added NLLB-200 for translation.
- Built and deployed a FastAPI backend on Hugging Face Spaces to serve the model end to end.
- Benchmarked model performance against NCAIR1, a government-funded ASR system, using the Google FLEURS dataset.
- Diagnosed and resolved production-grade issues including decoding repetition loops, special-token leakage, and audio pipeline bugs.

Mobile Developer: Naija Translate *2026*

- Built the cross-platform app with React Native and TypeScript as the interface for the whisper-naija-v3b model.
- Released an Android APK on GitHub for real-world testing.

Research Support: Malaria Outbreak Prediction Project *2026*

- Supported a peer's ML thesis project: XGBoost modeling and SHAP analysis on DHS Program data, with a Gradio app deployed on Hugging Face.

SKILLS AND INTERESTS

Technical: TypeScript/JavaScript, React, React Native, HTML/CSS, Shopify (Liquid, Shopify CLI), Node.js, Python, FastAPI, PostgreSQL, Prisma, Redis, Supabase, Firebase, Git/GitHub, Figma, Hugging Face

Areas of Focus: Speech and language AI (ASR/NLP), Shopify development, full-stack application development

Interests: cryptocurrency and blockchain tools

Languages: English, Yoruba (fluent)

Hobbies: Reading (self-help, technology)

Sports: Football-soccer
